LIGHTING

Lighting in the kitchen is essential from both a task and ambience perspective. Food preparation typically takes place under wall cabinets where further illumination is often desirable.

Steina Quadro LED The square design of Steina Quadro is a natural shaped partner for cabinets and is often used within glass units to create feature displays.

Steina Kea LED The triangular styling of Kea is a timeless favourite in the UK. Use these underneath wall cabinets to provide additional task lighting.

Steina Faro LED

Steina Faro lights are typically positioned subtly underneath wall cabinets. Their unobtrusive design is a natural choice in a contemporary kitchen.

Steina Vectra LED Vectra lights are typically positioned under cabinets and shelving for minimalist design & installation.

Steina Downlight LED The contemporary circular design of the Steina Downlight can be used under wall cabinets or within them to create a display unit.

Tube lighting maximises impact and is easily positioned under wall cabinets. Use a continuous line or around specific areas.

Picka Plinth Lights LED Available in round or square designs.

Add plinth lights to the base of your kitchen units to add subtle ambience to the room. Illuminate your kitchen at night solely with plinth lights to create a 'show house' effect. Choose from square and round designs. 7
